

Wedge Mount

Ahmedabad Moulds Wedge Mount is designed for applications requiring passive damping and installation of high load equipment. This design incorporates a high-precision leveling system for easy height adjustment. And the large supporting surface of the wedge mounts permits optimum foundation support and rigidity. High solidity and equally high vibration insulation are obtained through the addition of selected insulating plates. The rectangular shape of the Mount is yet another advantage. This helps eliminate pad roll and entrapment of coolants and oils beneath the pad.

Applications:-

- Injection Molding Machines
- Pad Printers
- Machine Tools
- Presses
- Stamping Machines
- Boring Machines
- General Multi-Purpose Machines with Long Beds
- Shears
- CNC Lathes
- Surfaces and Cylindrical Grinders
- Drilling & Milling Machines
- Machining Centers
- Transfer lines

TYPE	LOAD KGS	LENGTH(L)MM	WIDTH(B)MM	HEIGHT(H)MM	RANGE OF ADJUSTMENT(MM)
AMWM-1	750	100	60	57	8
AMWM-2	1200	150	75	75	10
AMWM-3	2200	200	100	80	10
AMWM-4	4400	200	200	80	12
